DETAILED ACTION

1. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

U.S. Patent No. 6,687,729 to Sievert et al. teaches a system and method for managing a pool of threads for executing thread operations. Although Sievert et al. generally teaches the concept of reusable threads, Sievert et al. does not teach processing a request to create a thread that is not executed because an operation to process the request failed, by reusing an arrangement provided for supporting and managing another thread, and without creating a new thread.

U.S. Patent No. 5,991,792 to Nageswaran teaches a method, apparatus and computer program product are provided for dynamically managing a thread pool of reusable threads in a computer system. However, Nageswaran does not teach various embodiments of the applicant's invention such as processing a request to create a thread that is not executed because an operation to process the request failed, by reusing an arrangement provided for supporting and managing another thread, and without creating a new thread.
